

IN THE CLAIMS:

Please amend the following claim:

1        11. (Amended) A glass tube for a cathode-ray tube comprising:  
2                a panel unit having a panel screen;  
3                a neck unit holding an electron gun; and a funnel unit having a funnel-like shape,  
4        wherein the panel unit and the neck unit are bridged by the funnel unit, wherein  
5                physically strengthened glass is used in at least part of the funnel unit, the  
6        physically strengthened glass being manufactured through the steps of: molding by pressing  
7        fused glass; air-cooling the molded glass; heating the air-cooled glass again to 450-470°C; and  
8        cooling the heated glass slowly.
